- ◆ Gabion Structure Design
- ◆ Consultation
- ◆ Complete Installation

Our solutions are based on natural environment principals, tending to use locally available construction materials to blend in with the soils and vegetation where possible.

Welded Mesh

Hexagonal Woven Mesh

Retaining walls are extremely popular for holding back unstable embankments. Many different types of retaining walls are available, using brick, concrete block, tyres, stabilised soil, wooden logs etc. Gabion Baskets offer valuable experience on the technical and practical on-site knowledge in the design and use of Gabion Baskets for retaining walls.
